

All businesses are at risk
for a **CYBER ATTACK.**
PreciseSource can help you
protect your business.

IntelliSense

A threat is any circumstance or event with the potential to create loss. Today's organizations face more threats than ever before as dependence on the internet and related technologies open organizations up to cyber-attacks from any person, at any time, from any place. Companies attempt to stay on top of these threats, but the amount of data and information to process is often overwhelming.

That's why ThreatAdvice has created IntelliSense, a Threat Intelligence application to help you quickly assess risk and prioritize threats that matter to YOUR enterprise.

With the intelligence you receive from IntelliSense, you will be able to move from anticipation to action, armed with the information you need to proactively protect your organization from potential cyber threats.

WHAT'S INCLUDED:

- Ability to identify and address potential cyber threats proactively
- Acquire/Analyze information to identify, track, and predict cyber activities
- Collection of large threat data sets from multiple sources
(data sources include the FBI, major technology companies, and media sources among others)
- Threat Intelligence dashboard and Board reporting capabilities
- Satisfaction of some regulatory requirements

Allow the ThreatAdvice IntelliSense intelligence platform to be your trusted partner as you navigate through the myriad of today's security challenges.
